EXPERIENCE

Apple Cherry Creek — Genius Bar / Specialist

Oct 2021- Ongoing | references available upon request

Part of a dedicated team of technicians tasked with repairing relationships

- ❖ iOS diagnostics, repair, and education
- ❖ Fast paced work environment & relentless pursuit of perfection
- ❖ Team oriented workflow and effective communication strategy

NCAR Earth Observing Lab — Student Technician

June 2019 - September 2020 | references available upon request

Responsible for hundreds of thousands of dollars of assets as part of a team supporting NCAR's Earth Observing Laboratory including:

- ❖ Server and datacenter security and administration
- ❖ Workstations and Laptops, on both UNIX based and Windows OS
- ❖ On call diagnostics and service for Lab machines and networks

UBreakIFix — Technician and Representative

June 2018 - November 2018

Desktop & Mobile diagnostics and repair, across all platforms

EDUCATION

University of Colorado, Boulder — Information Science BS Atmospheric Science Minor

Autumn 2016 - Spring 2022

INFO program emphasizes intelligent design, data analytics, and effective communication strategies, through a variety of methods including:

- ❖ Large & small scale data analytics
- ❖ Python data manipulation & effective visualization strategies
- ❖ Human oriented design & ethical research methodology
- ❖ Web development & scraping (HTML, BeautifulSoup)
- ❖ Ubiquitous computing design concept work
- ❖ Applied Machine learning

ATOC program emphasizes an understanding of the complex atmospheric and oceanic mechanisms on Earth, including:

- ❖ Global climate dynamics and integrations
- ❖ Climate Change modeling & mitigation

PROJECTS of RELEVANCE

BacNav— Backcountry Tracking & Safety Device

Ubiquitous computing prototype study oriented toward backcountry skier safety. Our study included academic research and first person interviews

Consumer Politics — Machine Learning | Data Aggregation

Capstone project: As a team, integrated a custom corporate consumer opinion & trends dataset into a robust machine learning model to predict political outcomes. Intend to create more accurate forecasts than polling.

TECHNICAL SKILLS

Python

Tableau

Pandas & Altair/Vega

Github/git

Application prototyping

Application prototyping

HTML & CSS

Adobe Suite

SQL

Scikit learn

C++

LANGUAGES

English & Mandarin
